-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of Species f (figure 9) in the reply filed on 7/29/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 5-6,22-23,34 and 45 were indicated for withdrawal by applicant from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/29/05.

Additionally, claims 4,19-21,24-33,35-39,41-44 and 46-48 include the limitation of a support device, which is not included in the species of figure 9. Instead, the support device 400 is an element of figures 6B-6C. Claims 4,19-21,24-33,35-39,41-44 and 46-48 are also withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Priority

Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. Please amend the priority paragraph in the specification to include the patent number of the parent application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,7-8,11-18 and 40 are rejected under 35 U.S.C. 102(b) as being anticipated by Ford et al (5,681,285). Ford discloses a control unit (80) a syringe (20), plunger (34), an interface module (10), syringe interface (clamping devices, see 8:10+), and drive member (see 8:19-20). See figures 1 and 5. The device also includes a motor (see 8:50+), a power source (84), one or more devices for controlling the drive member (keyboard 16 and internal memory with drug library) and a communication line (82). As shown in figure 5, the syringe interface module is adapted to be lain next to a patient or be placed in any suitable position since it is not fixed and physically separate (other than the communication line) to any other structures. The control unit includes a housing an circuitry (microprocessor among other circuitry). The control unit has a switch (on/off switch). The device also includes a batter. See 10:23+.
